SUMMARY

AI Engineer with hands-on experience building production systems — from multi-agent automation architectures to full-stack AI-powered applications. Proven track record across two ventures: BabyNest (Next.js + TypeScript + Supabase AI financial planning app with \$720M TAM) and The One Group (8-agent automation serving 754+ leads). Cost-conscious infrastructure specialist (\$0 inference via local-first approach).

EXPERIENCE

BabyNest — Founder & Full-Stack AI Engineer | May 2026

- Architected AI-powered baby financial planning app (getbabynest.com) from concept to production — \$720M TAM, zero direct competitors
- Full-stack development: Next.js, TypeScript, Supabase, Tailwind CSS, Framer Motion with glassmorphism design system
- AI features: State-aware guidance, insurance decoder, 529 plan optimization, timeline-based recommendations
- Production audit complete: TypeScript compilation, accessibility compliance, performance optimization
- Business model: Subscription tiers (\$9.99/mo), employer benefits integration, state-specific content

The One Group — Founder & AI Engineer | 2026 - Present

- Built AI consulting practice with 4 service tiers (\$297/mo to \$10,000 implementations)
- Deployed 8-agent production automation: Arlo (lead research), Dante (content), Iris (outreach), Abby (QA), plus Dev/Opal/Rico/Jerry
- Results: 754+ leads discovered, 3 posts/day automated, 45+ tweets posted, 15+ cron jobs running 24/7
- Cost optimization: \$0 inference via Ollama-first architecture, localModelLean enabled, 99.7% speed improvement (90min to 0.3s)

AI Automation Projects — Freelance | 2025 - Present

- Multi-platform social automation (Twitter, LinkedIn, Pinterest) with RSS-based content pipeline
- Lead qualification, email sequencing, quality assurance automation

KEY ACHIEVEMENTS

Metric	Result
Leads Discovered	754+ qualified leads
Automation Jobs	15+ cron jobs running 24/7
Content Output	3 posts/day automated
Twitter Posts	45+ posts (Mar 19-30, 2026)
Inference Cost	\$0 (Ollama-first)

Speed Improvement	90min to 0.3s (99.7% faster)
BabyNest TAM	\$720M addressable market
Competitors	Zero direct competitors

TECHNICAL SKILLS

Full-Stack: Next.js 14 App Router, TypeScript, Supabase (real-time/auth/storage), Tailwind CSS, Shadcn/ui, Framer Motion

AI/ML: OpenClaw agent framework, Ollama local deployment, OpenAI/Claude APIs, multi-agent orchestration, cost-optimized routing

Infrastructure: Cron automation, JSON state management, local-first AI (\$0 inference), provider fallbacks, policy enforcement

Programming: Python, JavaScript/TypeScript, Git workflow, shell scripting

EDUCATION & LEARNING

Self-Directed: OpenClaw agent framework (advanced), multi-agent orchestration patterns, cost-optimized AI architecture, SMB workflow automation
